

# PROCESS CONTROL PACKAGE

Turn-Key solution for solids control in  
activated sludge plants

Industry proven for 25 years!

16 foot  
CORETAKER

Process  
Centrifuge

3 Settlers

With the instruments above, you'll receive a complete instruction booklet to implement this easy and cost effective method in your plant. Obtain quick and reliable estimates of the suspended solids concentration in % by volume of mixed liquor and return and waste sludge samples.

Under control, you will make adjustments to return activated sludge (RAS) flow and waste activated sludge (WAS) with confidence.

Process Control Package includes:
