

Brightly marked polycarbonate conical shaped centrifuge tubes

Tubes shown at rest in the bronze trunnion rings of the Raven Centrifuge horizontal rotor. Centrifuge model F-10300.

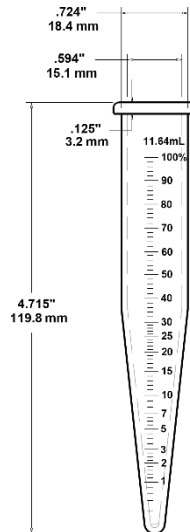

Tubes during ascent to full horizontal swing position.

Tubes at full 90-degree angle to axis of rotation.

Conical shape of tube accentuates relatively small amounts of solids concentrations – as low as 00.20%.

Raven sample tubes are available in 19mm diameter. Brightly marked to indicate % volume.

DESCRIPTION
19 mm tubes
